

April 18, 2019

Dear Friends,

We are “looking” for your help! Our Lower Lights Christian Health Center patients depend on us for whole family wellness, including primary care, dental, counseling, pharmacy, spiritual care, Medication Assisted Treatment and Vision Services.

In the population we serve, our patients are at higher risk for eye diseases like hypertensive and diabetic retinopathy. Children whose vision could be corrected by glasses often do not have access to an optometrist which affects their ability to read and be successful in school. Adults may struggle in the workplace, wearing a prescription that is no longer adequate.

Our Vision suite at the Health Center is woefully in need of updates in terms of outdated restrooms, old wallpaper, worn-out carpet and equipment and furniture that need to be replaced. We see 2,300 patients each year, and serve as a clinical rotation partner for students from the Ohio State University College of Optometry. Our goal is to expand our services to see more children in particular, but first some renovations and new equipment are necessary.

A generous donor recently contributed \$20,000 towards this project, which puts us more than halfway towards our goal of \$35,000! I am asking you to make a gift today so that our patients can receive the care they need in an updated, clinically appropriate environment. You may donate by check (payable to Lower Lights Christian Health Center, 1160 W Broad St, Columbus, OH 43222, with the memo Vision2020) or online at llhc.org.

Thank you for supporting our mission in this special campaign!

Warmly,

A handwritten signature in blue ink that reads "Tracy Cloud".
